

Potential of IoT in Infectious Disease Management

Presented To:

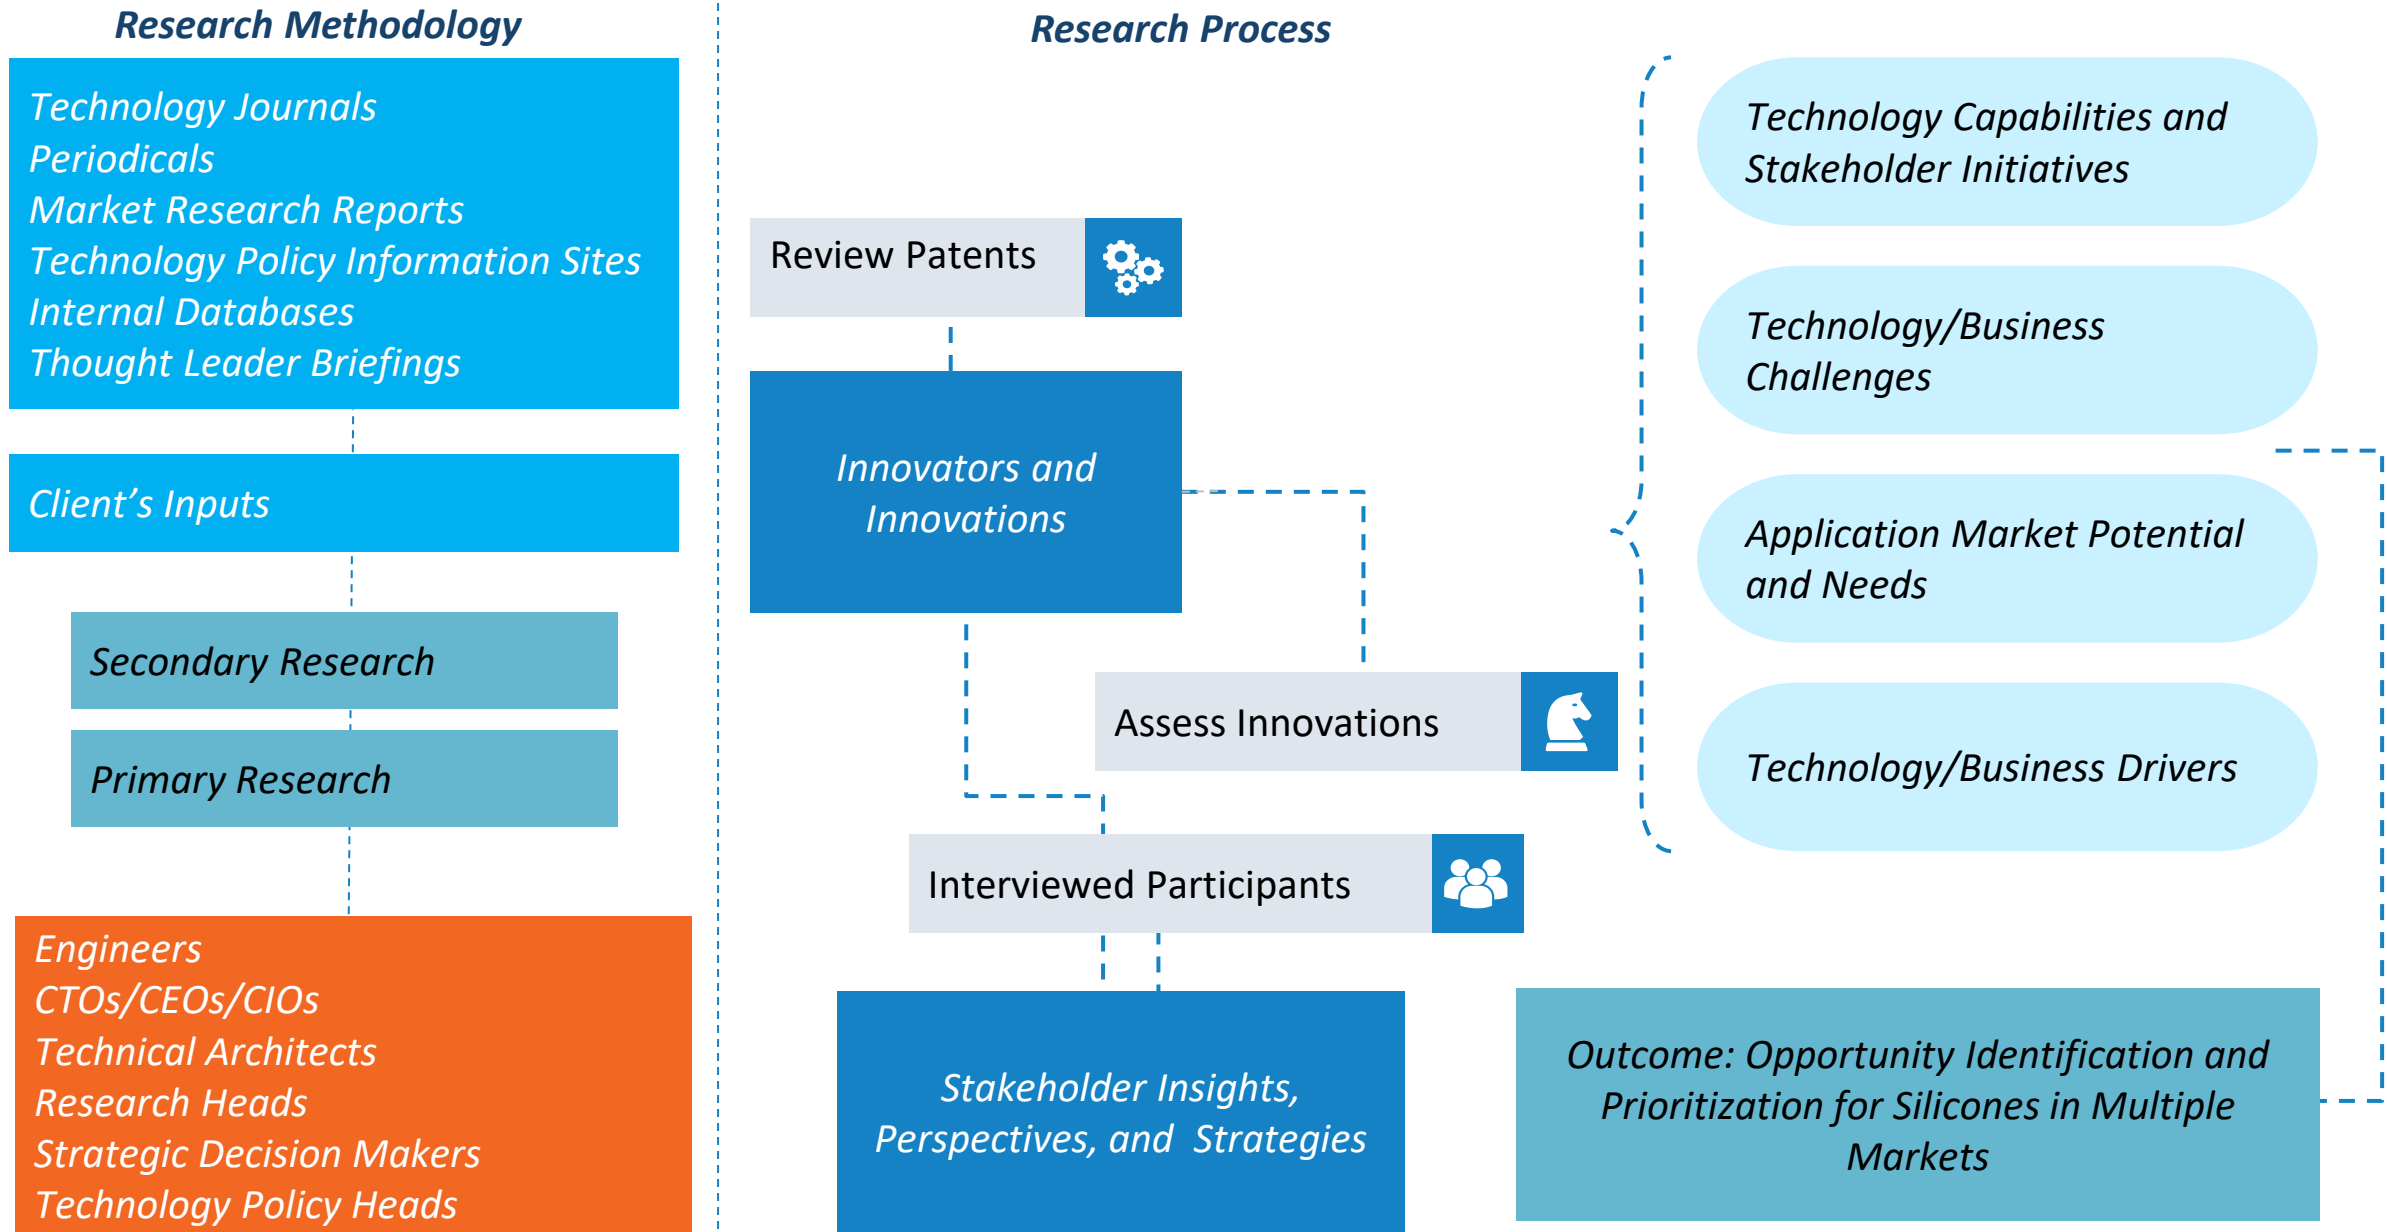

May 2020

TABLE OF CONTENTS

Section
1. Executive Summary
1.1 Research Scope
1.2 Analysis Framework: Frost & Sullivan Core Value
2. Infectious Diseases: Technology Snapshot
2.1 Global Pandemics and Virus Outbreaks (Flu, COVID-19)
2.2 Technologies Driving Infectious Disease Management
3. Monitoring the COVID-19 outbreak using IOT
3.1 Predicting Disease Outbreak
3.2 Tracking the spread of disease
3.3 Developing portable, user-friendly and cost-effective diagnostics
4. Restraining COVID-19 Spread
4.1 Emerging Treatment Options
4.2 Emerging Vaccination Options
5. Key Conclusions

1.2 ANALYSIS FRAMEWORK: FROST & SULLIVAN CORE VALUE
