

Future roles of educators in the age of AI

Asst.Prof.Likit Preeyanon, Ph.D.

Deputy Dean for Information Technology

Faculty of Medical Technology, Mahidol University

AI will only get better

- AI will assist teachers with administrative tasks
 - Teaching plan and grading
 - Quality accreditation
 - Research

But with limitations...

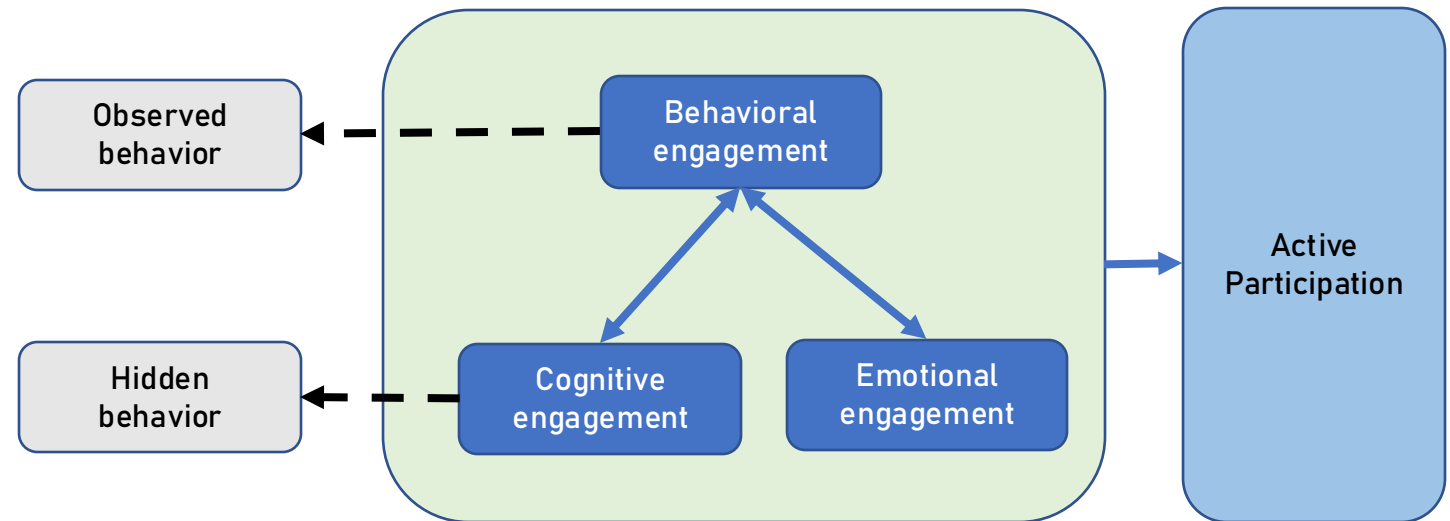

- Lacking interaction and real-world understanding
 - Lack of world interaction
 - Nuance in human emotion
- Flaws in deep logical reasoning
 - No deep understanding leading to illogical and contradictory conclusions
 - Circular reasoning

Roles and competencies of future educators

- Focusing on the development of soft skills
 - Critical thinking
 - Creativity
 - Emotional intelligence
- Enhancing engagement
- Creating good learning experience
- Providing supports

Hu M. & Li H. 2017

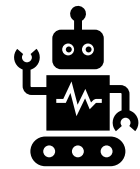

Roles and competencies of future educators

Teachers should provide an environment where students can collaborate to create their own knowledge.

Teacher should:

- Ask good question
- Provide guidance
- Facilitate discussion
- Help student reflect on their learning
- Give constructive feedback
- Inspire

AI & Other sources

Interaction

Student

Student

If they create it, they own it!

Teacher + Real world experience + Range of knowledge

Why would students come to class if they can get the same knowledge elsewhere?

Thank You
